PROJECTS

Video Live Streaming Platform   *Feb 2022 – Mar 2022*
Tech Stack Used: React, Rapid API, HTML , CSS ,Youtube v3 api
- Developed a full-fledged video streaming platform similar to YouTube using React for the frontend, HTML, and CSS for the user interface, ensuring a seamless and responsive user experience.
- Integrated the Rapid API and YouTube v3 API to fetch and display a vast array of videos, leveraging the power of external APIs for content enrichment and diversity.
- Employed responsive design principles, ensuring the platform is accessible and functional across various devices, enhancing user engagement and accessibility.
- Implemented dynamic content rendering to showcase trending videos, user subscriptions, and personalized recommendations, enhancing user engagement and retention.

TodoDjango Application   *Oct 2022 – Nov 2022*
Tech Stack Used: Python , Django, HTML , CSS
- Developed a robust Todo application using Python and Django, providing users with a feature-rich and intuitive platform for task management.
- Implemented the backend logic using Python and Django, utilizing Django models to define the data structure and Django's ORM for seamless database interactions.
- Implemented Create, Read, Update, and Delete (CRUD) operations for tasks, providing users with the ability to add, view, edit, and remove tasks effortlessly.
- Designed and implemented a clean and user-friendly frontend using HTML and CSS.

Employee Data Management Application   *Jan 2023 – Jan 2023*
Tech Stack Used: PHP , MySql, HTML , CSS
- Designed and developed a comprehensive Employee Data Management System using PHP and MySQL, providing an efficient and secure platform for managing employee information.
- Implemented Create, Read, Update, and Delete (CRUD) operations for employee records, allowing seamless management and maintenance of personnel information.

WORK EXPERIENCE

ITNow Inc – Remote   *Jul 2023 – Dec 2023*
ServiceNow Developer
- Developed and configured ServiceNow applications, modules, and workflows to automate and streamline business processes, improving efficiency and reducing manual intervention.
- Worked on the customization of ServiceNow Service Portal, designing user-friendly interfaces for improved accessibility and user experience.
- Collaborated with cross-functional teams to analyze business requirements and design custom solutions within the ServiceNow platform, contributing to the enhancement of overall IT service management.
- Implemented ServiceNow best practices and followed ITIL framework principles to ensure the delivery of high-quality solutions aligned with organizational objectives.
- Acquired foundational knowledge of ITIL practices and principles through practical application within the ServiceNow platform.
